

This is a story about one mans venture to build an adult treehouse with all the bells and whistles. Follow your dreams and use the lessons learned about leadership throughout your life to accomplish your goals. This is a forty-year personal journey that builds upon experiences with family, the military and manufacturing. The goal here was to build a self-contained structure and work through the planning that involved engineering, drafting and electricity. This project was built on creativity, imagination and teamwork, which can be used on any project at home or work. The full-color photographs, sketches and planning take you through the steps that were necessary and illustrate helpful building tips. It is time to have fun and be young again!
